

Ehsan Moradi

Senior Full-Stack & AI Engineer | CTO (Hands-on) | AR / Rendering / Systems

ehsan.hightech@gmail.com | GitHub: github.com/ehsanwwe | Remote

SUMMARY

Senior engineer and hands-on CTO with 20+ years of experience building production software across full-stack applications, AI systems, backend platforms, and real-time graphics. Strong track record of delivering AR, rendering, and computer-vision products end-to-end, with a focus on performance, scalability, and clean system design.

CORE EXPERTISE

- Full-Stack Development (frontend and backend)
- AI Systems: LLMs, RAG, agents, computer vision
- Backend Architecture, APIs, caching, and analytics
- Real-time Systems, AR, 3D rendering, and custom engines
- System Design, performance optimization, and production delivery
- Technical leadership, team management, and product ownership

TECHNICAL SKILLS

Languages: C#, C++, Java, PHP, JavaScript/TypeScript, HLSL

Frontend: Next.js, React, HTML, CSS, Tailwind

Backend: Laravel, Node.js, Redis, APIs

AI / CV: OpenCV, LLMs, RAG, agents

Graphics / AR: Unity, WebGL, Three.js, AR systems, rendering engines

Tools: Git, Docker, Linux

PROFESSIONAL EXPERIENCE

Awakening Dreams — CTO (Hands-on) | 2019 - Present

- Designed and built a SLAM-based AR engine for real-time furniture visualization with realistic placement and interaction.
- Built Mediuty, an AR virtual makeup platform, including a custom real-time rendering engine and a web-accessible version.
- Developed an AI-powered consultation chat system to guide users through product discovery and engagement.
- Created a RAG-based recommendation engine that selects products from chat context and user intent.
- Built a full e-commerce platform for cosmetics with inventory management in Laravel, Redis caching, and analytics.
- Developed a platform similar to Covalo for raw material discovery and product matching.
- Built a generative AI system for generating standard hospital architecture plans.
- Managed the engineering team, defined architecture, and stayed actively involved in implementation across backend, frontend, AI, and graphics.

360KIA — Senior Software Engineer | 2013 - 2019

- Built one of the first spherical 360-degree video playback engines using C# and game-engine techniques.
- Developed an early markerless AR engine using sensor fusion from compass and accelerometer signals.
- Implemented real-time 3D placement so virtual objects could appear grounded in physical space without markers.
- Focused on performance optimization, real-time rendering, and low-latency visual output.

Spiral Design — Software Engineer | 2012 - 2013

- Built an interactive book engine for Android.
- Contributed to the award-winning interactive book 'Jungle Pariya'.

- Developed interactive media, animation, and user-interaction systems.

SELECTED PROJECTS

Mediuty: AR-based virtual makeup platform with a custom rendering engine and a web version.

AI Consultation System: Conversational AI assistant for product guidance and user support.

RAG Recommendation Engine: Context-aware product recommendation from user chat intent.

SLAM AR Furniture System: Real-time interior visualization with realistic placement.

Generative AI for Hospital Architecture: Automated generation of standard architectural plans.

EDUCATION

M.Sc. in Artificial Intelligence, Amirkabir University of Technology (Tehran Polytechnic), Tehran, Iran

Graduated: 2015

ADDITIONAL INFORMATION

- Also known online as: ehsan_wwe
- Deep experience in real-time systems and performance-critical software
- Comfortable leading teams while remaining hands-on in code and architecture
